

Addendum 7

1. Why do you want to switch off of Drupal 8? (We wonder if that was a typo and it was meant to say Drupal 7, since 8 is very new.) **We are currently in Drupal 7 and will be completely migrated to Drupal 8 by June 6 so we have a better mobile optimized website while a new redesigned site it being completed**
2. What about the version of Drupal you are using is not working for you? **Nothing we just want to if there is a better option out there.**
3. If indeed you are on D8 and want to switch, is WordPress an option for you? **It could be if it would meet our needs.**
4. How many firms have you asked to bid on the project? **It is out for public bid.**
5. What is your budget? **One has not been established yet.**
6. What is your deadline for launch? **Below is the schedule in the RPF. We would hope the CMS and a redesigned website is live Jan. 2017**

Addendum 8

So as long as you're good with Drupal 8 we have some good solutions. You are upgrading to Drupal 8 but you're still going to need to migrate everything over and get everything running on it and that's what the RFP is for right? **We are wanting a redesign of our website which will be a Drupal 8 site by the time the RFP's are due in. I would think most of the information on our current website will needed to be migrated over to the new website.**

Addendum 9

After a site review of <http://www.sandburg.edu/> our team has found that this site is leveraging Drupal 7. Can you please confirm the following:

1. This is the website that is in need of a new CMS? **Yes**
2. Sandburg would like to get away from Drupal as a CMS OR just wants to move away from the current version of Drupal (assuming to be Drupal 7) and would be open to an upgrade to Drupal 8? **Our current website is Drupal 7 but it is being upgraded to Drupal 8 by June 6 so we have a better mobile optimized website while a new redesigned site it being completed.**

While we have been satisfied with Drupal we just want to see if there is a better option out there.

3. If Sandburg is looking to get away from Drupal and move to a whole new CMS, can you please outline what your current issues are with Drupal that would make you want to move away from it? **We don't have any issues with Drupal** If these issues can be addressed with configuration of the current system or an upgrade to Drupal 8, would Sandburg be open to responses that propose this approach? **Yes we would.**

Addendum 10

Can you please confirm if a website redesign should be quoted for as part of this initial RFP? Or if that is something you will look at after the CMS has been selected. **We would like a redesign included.**
