

Addendum #1

Questions for Content Management System

1. Are you planning a new site website redesign as part of this project? If so, are you working with a consultant or will you be creating the design in house? **REDISIGN AND LOOKING FOR CONSULTING FROM THE COMPANY THAT WINS THIS BID**
2. Can you please identify the reasons for moving away from Drupal? Do they include product feature/function, personnel and/or other issues? **WE AREN'T NECESSARILY UNHAPPY WITH DRUPAL AND ARE SIMPLY LOOKING FOR A REDESIGN WITH OR WITHOUT USING DRUPAL.**
3. Requirement i) under **Required Characteristics and Functionality** states “Ability to display dynamic employee directory.” Please describe what you mean by “dynamic”. For example, is the information being held in a database that is updated regularly, and the CMS must access, is employee information to be maintained entirely (or partially) within the CMS? **A directory that is searchable, our current directory isn't part of our current website. Our current directory is its own website using a sql database to manage the entries, it would be nice to have it integrated into the new website.**
4. Will you prefer the CMS be installed locally on your own servers, or hosted as a cloud solution? **DEFINITELY HOSTED AS A CLOUD SOLUTION**
5. How many individuals at your institution will need to use the CMS? **Around 20 people edit the current website.**
6. Will you require content migration services? How many pages of content need migration? **We would be migrating over around 1500 pages from current website.**
